Recycling Works!

When manufacturers use recyclable materials we provide instead of using raw resources from nature, it reduces pollution, greenhouse gases and protects the planet's life support systems.

—But only if it's done right!

Wishful recycling items that are not recyclable ruins the good recyclable materials, damages sorting equipment and disrupts the whole system.

Recycle these materials

All recycled materials must be empty, clean & dry

Paper

Metal

Plastics

Recycle Glass Separately
Bottles & Jars only. Any color.

When in doubt, **find out** or leave it out.
