Purpose:

To conserve, manage, and protect the park system’s diverse natural habitats and resources; and the fish and wildlife populations they sustain; for their ecological values and for the benefit and enjoyment of current and future generations; and to inform and educate the public about these resources to promote understanding, appreciation, and a stewardship ethic.

Goals and Objectives:

A. Goal: The Park Commission will strive to protect native habitats and associated wildlife species with the interest of promoting maximum levels of biodiversity and viable ecosystems in the lands under its stewardship responsibility.

Objectives:

1. Protect, maintain, and enhance a mosaic of habitat types for wildlife.

2. Identify critical habitat and locations of existing populations of endangered and threatened wildlife species. Protect existing populations and restore degraded habitat where appropriate and feasible.

3. Rely on natural resources specialists to evaluate actions that have the potential to negatively disturb wildlife populations for adverse impacts. Identify the appropriate avoidance or mitigation strategies.

4. Protect areas that preserve the natural connectivity of habitats to maintain the genetic diversity of species.

5. Develop species-specific best management practices.

6. Initiate and support cooperative programs that are designed to protect, manage, or research habitats and/or wildlife populations.
7. Protect parklands from new invasions of non-native invasive wildlife species. Remove existing non-native invasive wildlife species as appropriate and feasible.

B. Goal: The Park Commission recognizes that wildlife can cause conflicts such as damage to private and public property; damage to other wildlife and habitats; and negative human health impacts or injuries. The Park Commission will evaluate these situations to determine whether control measures are warranted.

Objectives:

1. Implement control measures for an individual animal or population of animals if any of the following conditions are documented:
   
   a. An injured, diseased, rabid, or otherwise unpredictable animal presents an immediate threat to human safety or health.
   b. A threat of physical injury or disease transmission to humans exists due to abnormal or excessively conditioned animal behavior, particularly in public use areas.
   c. High quality natural areas, rare species, or other sensitive natural resources face high levels of impact from the behavior of an individual animal or population of animals.
   d. Unacceptable damage is occurring to park infrastructure, cultural resources, gardens, golf courses, landscaping, public property, or private property.
   e. An animal or population of animals has inhabited a structure or building.
   f. A feral or escaped domestic animal has taken up residence on parkland.

2. Employ control measures that seek to minimize adverse impacts to the animal(s) in question if appropriate and economically feasible.

3. Adopt standard protocol to evaluate and treat the conflicts listed in section B1 and disseminate this information to Park Commission staff.

4. Develop programs to manage overabundant wildlife populations in situations where said populations pose chronic threats to the viability of park resources and habitats.

5. Base all wildlife control measures and management programs on:

   a. All applicable laws and regulations
   b. Park Commission natural resources conservation objectives
   c. Approved park plans
   d. The best available science and information
   e. Accepted ecological principles
   f. Proven wildlife management techniques
   g. Appropriate animal welfare concerns
   h. Site and situational limitations
6. Employ control measures and management programs that are biologically, socially, environmentally and economically sound, effective, and practical.

7. Apply an adaptive management approach that seeks to improve management strategies over time by learning from previous outcomes.

8. Initiate and support cooperative and regional programs that are designed to reduce, manage, or research overabundant wildlife populations.

C. Goal: The Park Commission will educate its staff, volunteers, and the public about wildlife related issues to foster understanding, appreciation, and to promote a stewardship ethic.

Objectives:

1. Develop programs that effectively disseminate science-based information about wildlife, their habitats, threats to their well-being, and conservation strategies.

2. Encourage the use of park property by students conducting academic research and school groups participating in instructor-led environmental labs and studies.

3. Encourage efforts that develop public understanding of and dialogue about wildlife management challenges faced by the Park Commission and the County.

4. Promote safe, ethical, and responsible behavior towards wildlife species through example and educational programs.

5. Encourage staff participation in management strategies and programs.

6. Develop communication and data collection procedures with Park Commission field staff.
