Family and Community COVID-19 Update
January 6, 2022

The outbreak on Waypoint’s Horizon Program continues and there are now nine patients who have tested positive for the COVID-19 virus. We also have two patients on other programs who have tested positive and are isolated and being monitored.

The entire Horizon Program is considered to be in outbreak status at this time and enhanced droplet/contact isolation precautions are in place.

The unit continues to be closed to admissions and transfers, and all group activities and communal dining is suspended. The program is also closed to general visitors.

Essential visitors/care partners continue to be permitted following a negative rapid test. All essential visitors/care partners must meet with staff for instruction on personal protective equipment (PPE) before coming onto the program.

While visitation is limited, our teams are making every effort to increase the availability of virtual visits as a way to connect with loved ones.

We know this has not been easy for our patients, clients, their families and our staff, however, we can assure you that Waypoint has enhanced cleaning and multiple safety measures in place. We remain focused on infection prevention and control measures, and the safety of patients, clients, staff and our community.

We are very grateful to our staff for their tireless efforts in keeping everyone safe while continuing to provide essential care to all patients.

Resources for Patients and Families
Supports for patients and families are available from our Spiritual Care Team, the Patient/Client and Family Council and the Patient Relations Office. More information can be found at www.waypointcentre.ca/patients___families
