Family and Community COVID-19 Update
October 7, 2021

While the respiratory outbreak on Toanche Level 6 remains in place, all COVID-19 test results have come back negative. The nature of the outbreak is not known, however these negative results are a strong indication that it is not related to COVID-19.

There has been no further symptoms for any patients, including those with the original symptoms. Full precautions will remain in place until the outbreak is declared over, which is eight days after the last onset of symptoms. If there are no additional symptomatic patients or staff, the outbreak could be declared over by the middle of next week. Until this time, movement on and off the program will remain restricted and patient visits are suspended. Virtual visiting is available.

Thank you again for your patience. We are grateful for the support from everyone involved in managing the outbreak and supporting our patients while they are confined to the unit.

This update and all others can be found on our website at www.waypointcentre.ca. We will share more information as it becomes available.

Resources for Patients and Families
Supports for patients and families are available at the contacts below. More information can be found at www.waypointcentre.ca/patients__families
